PROFESSIONAL PROFILE

Software Developer and Mechatronics Engineer with experience building and maintaining production software across the full development lifecycle. Focused on backend and full-stack development, with experience in APIs, databases, web applications, cloud infrastructure, and software automation. Skilled at turning business and technical requirements into reliable, secure, and practical solutions, while collaborating with multidisciplinary teams and supporting software from development through production.

HARD SKILLS

Python | Odoo | PostgreSQL | SQL | Java | Spring Boot | JavaScript | HTML | CSS | REST APIs | AWS | Docker | Linux | Nginx | Git/GitHub | Postman | MySQL | MySQL Workbench | Jira/Trello | Figma | Agile Methodologies (Scrum) | C/C++ | MCP | AI Agents | API Integration | Data Pipelines | Network Administration & Security

SOFT SKILLS

Problem Solving | Ownership (Code to Production) | Continuous Learning | Effective Communication | End-User Training

PROFESSIONAL EXPERIENCE

Software Engineer — Kingstrong (Oct 2025 – Present)

- Designed, built, and deployed a multi-tenant SaaS platform on AWS using Python, PostgreSQL, Docker, and Nginx, delivering Odoo as a service with automated provisioning, isolated client environments, and recurring billing.
- Built and maintained 50+ custom ERP modules in Python across HR, Sales, CRM, Purchasing, Inventory, and Accounting, automating business workflows and replacing spreadsheet-based processes.
- Developed production APIs and data pipelines for payments, marketing, and messaging, integrating Conekta, Mercado Pago, Google Ads, and self-hosted WhatsApp infrastructure.
- Owned the DevOps and production lifecycle, managing Linux/AWS infrastructure, Docker deployments, PostgreSQL databases, backups, monitoring, and Odoo database migrations across development, staging, and production.
- Managed production deployments, troubleshooting, and technical documentation, supporting the operation and adoption of internal software systems.

Freelance Developer (Aug 2025 – Oct 2025)

- Delivered freelance software and web projects for different clients, adapting solutions to business requirements and technical constraints.
- Developed e-commerce and web solutions using Java, Spring Boot, JavaScript, MySQL, REST APIs, HTML, and CSS.

Java Full-Stack Developer — Generation (May 2025 – Aug 2025)

- Completed a full-time, project-based program focused on Agile/Scrum methodologies and industry software development practices.
- Built full-stack applications using Java, Spring Boot, JavaScript, MySQL, and REST APIs while working in sprints with Git/GitHub and Jira.

Logistics Specialist — R2 (Jun 2022 – Jan 2023)

- Implemented a documentation and traceability system that improved delivery tracking and reduced incidents in hazardous-material logistics.

CERTIFICATIONS

Python Programming – Santander Open Academy, 2024 | Introduction to Java – Fundaula, 2025 | Google Data Analytics – Coursera, 2024 | C Programming: Algorithm Development – Edutin Academy, 2024 | Cisco Packet Tracer Fundamentals – Edutin Academy, 2023

EDUCATION

B.S. in Mechatronics Engineering — TecNM Campus Querétaro (Aug 2018 – Jun 2024)

Language Diploma — Tecnológico de Monterrey (Jul 2018 – Aug 2020)

LANGUAGES

Spanish: Native | English: B2
